

The Exam 8 Study Kit for 2022 included an update to the NCCI Experience Manual.

In the past, the excerpt from the manual has included pages for the State of Alabama, that included:

W (weighting) values by expected losses,
B (ballast) values by expected losses,
ELRs (expected loss rates) by class,
and D-Ratios (discount ratios) by class.

These pages are not included in the updated manual.

If required any such values will have to be given to you within an exam question.

In my Section 11 on the NCCI Experience Rating Plan, at page 1526 I say:

Note the W and B tables at the end.

Note the Table of ELRs and D-Ratios by class, near the end.

This no longer applies.

At page 1530, I give an example of the values that used to be included in the excerpt.

Exam questions, where values had to be looked up in the pages no longer included in the excerpt of the NCCI Experience Rating Plan:

11.47 (9,11/02, Q.33), 11.48 (9, 11/03, Q.27), 11.51 (9,11/06, Q.24), 11.53 (9, 11/07, Q.28),
11.54 (9, 11/08, Q.25), 11.55 (9,11/09, Q.21), 11.56 (9, 11/10, Q.20), 11.61 (8, 11/16, Q.10).
