

Mahler Practice Exams for Exam STAM

These practice exams cover the entire current syllabus.
(They include those questions from my Exam C Practice Exams that are still on the syllabus, plus new questions that cover the new syllabus material on STAM.)

The first seven practice exams contain 20 questions each (2 hour exams), while the next eight practice exams contain 35 questions each (3.5 hour exams), for a total of **420 questions**.

(Your exam will be 35 questions in 3.5 hours.
Many people find it helpful to take some shorter practice exams.
For example, the shorter exams may be more suitable for weekday nights.)

The difficulty and mix of questions by topic on each exam is similar to Exam STAM.

Complete solutions to problems are at the end of each practice exam.

These are new questions specifically written for these exams by me.
These questions are not included in Mahler's Guides to Exam STAM, which are sold separately.

These practice exams are self-contained.

"Your practice questions were similar in style and format to those on my exam."
"I thought the questions on my exam were close in difficulty to your practice exams."
"These practice exams make you think, which is a good thing."

Author Biography:

Howard C. Mahler is a Fellow of the Casualty Actuarial Society, and a Member of the American Academy of Actuaries.
He has published study guides since 1996.
He taught live seminars and/or classes for many different actuarial exams from 1994 to 2017.

He spent over 20 years in the insurance industry, the last 15 as Vice President and Actuary at the Workers' Compensation Rating and Inspection Bureau of Massachusetts.
He has published many major research papers and won the 1987 CAS Dorweiler prize.
He served 12 years on the CAS Examination Committee including three years as head of the whole committee (1990-1993).
